JPEG

Also known as a Joint Photographic Experts Group, This dish provides a more colorful taste palette that leads you remembering every bite. It's light in size so you won't gain weight as fast as your appetite.

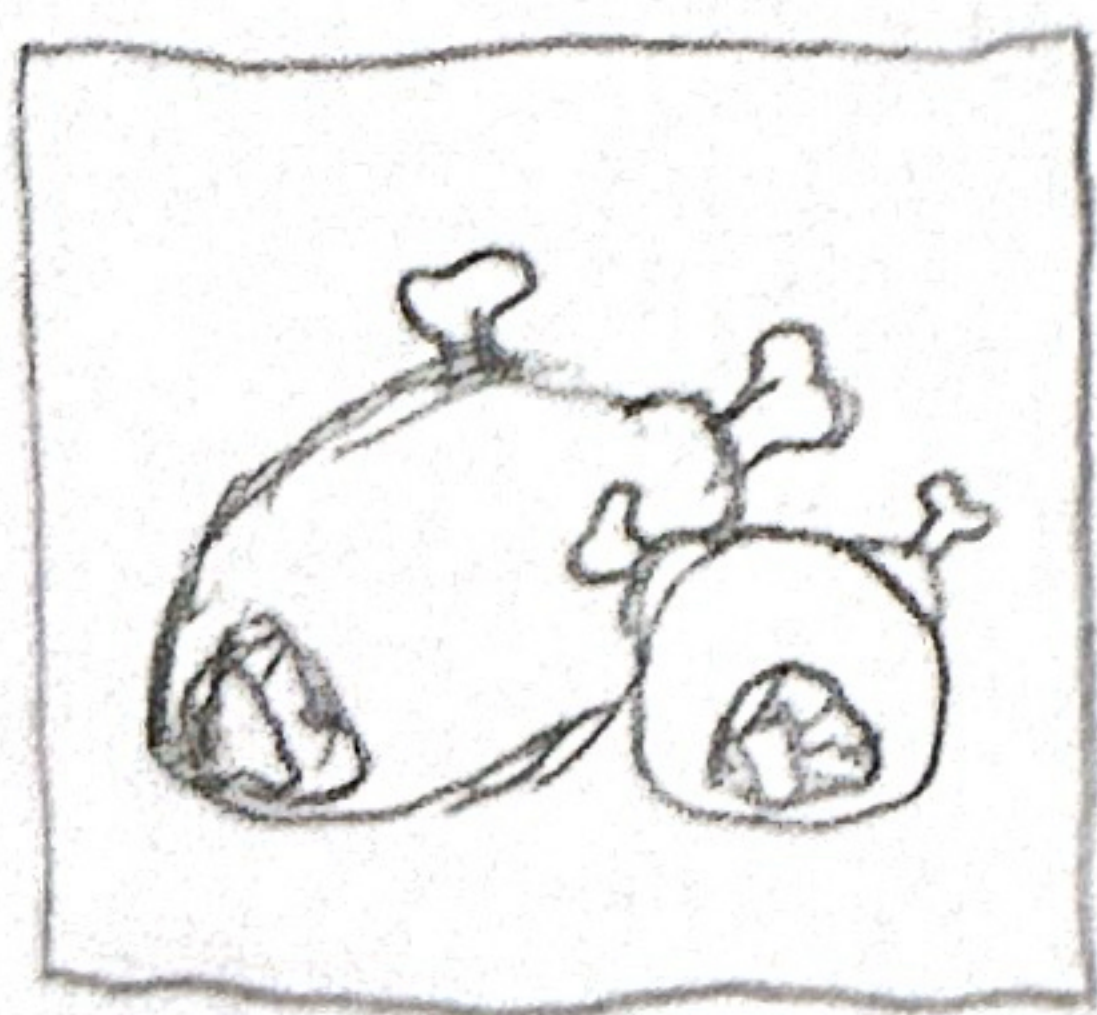

PNG

Portable Network Graphics is a larger meal than you will expect, but will still be loving it nonetheless. You can choose how much you want without issue, and you will experience the most flavorful taste you'll ever have.

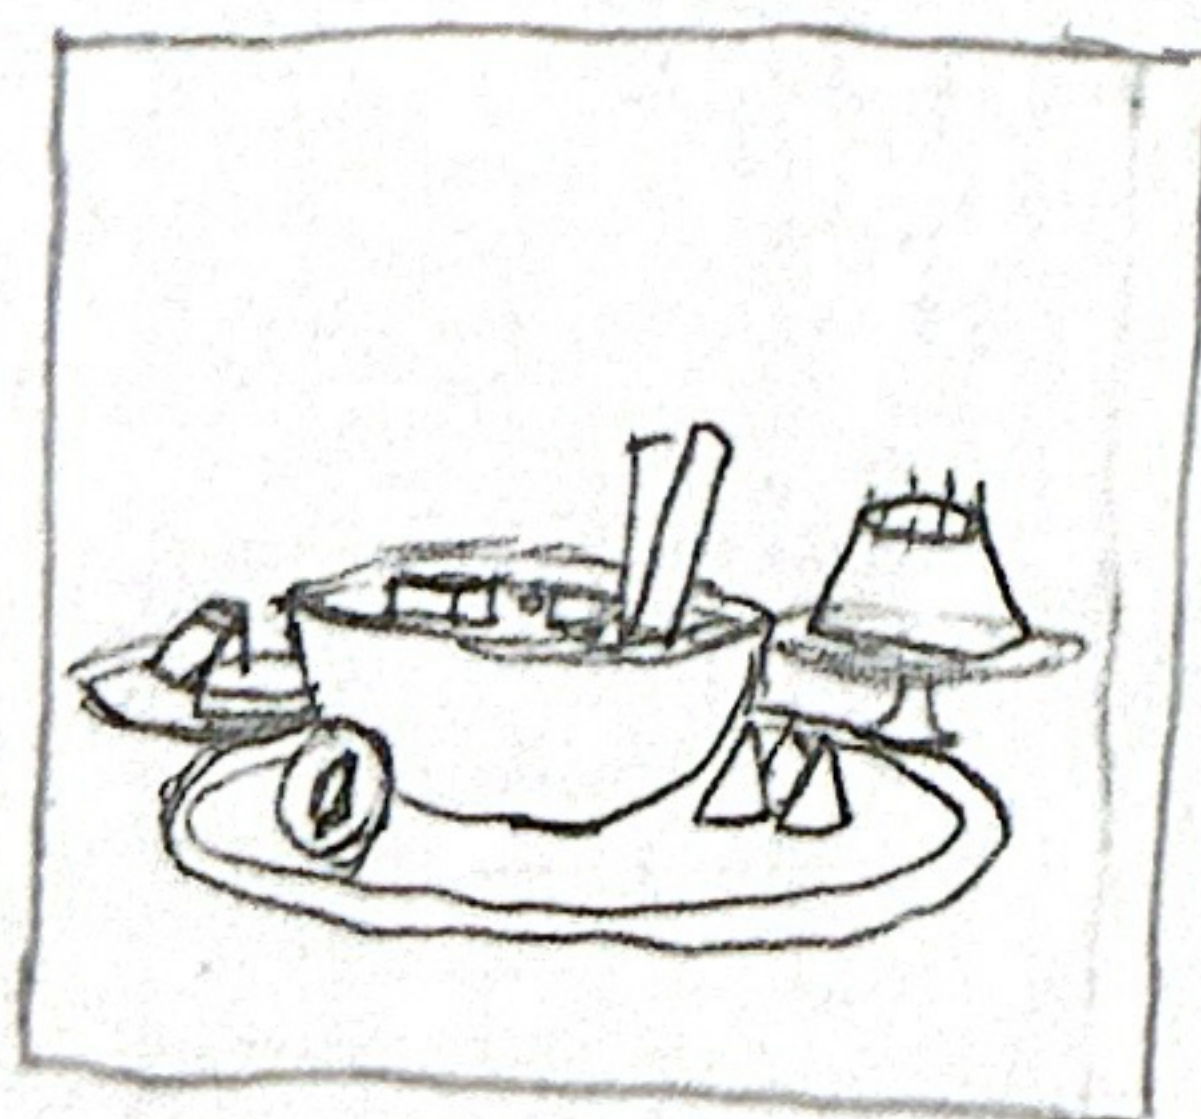

GIF

The Graphics Interchang Format while not the most detailed in the flavor market, your taste buds will still delight as you taste many different flavors one after another as you taste it.

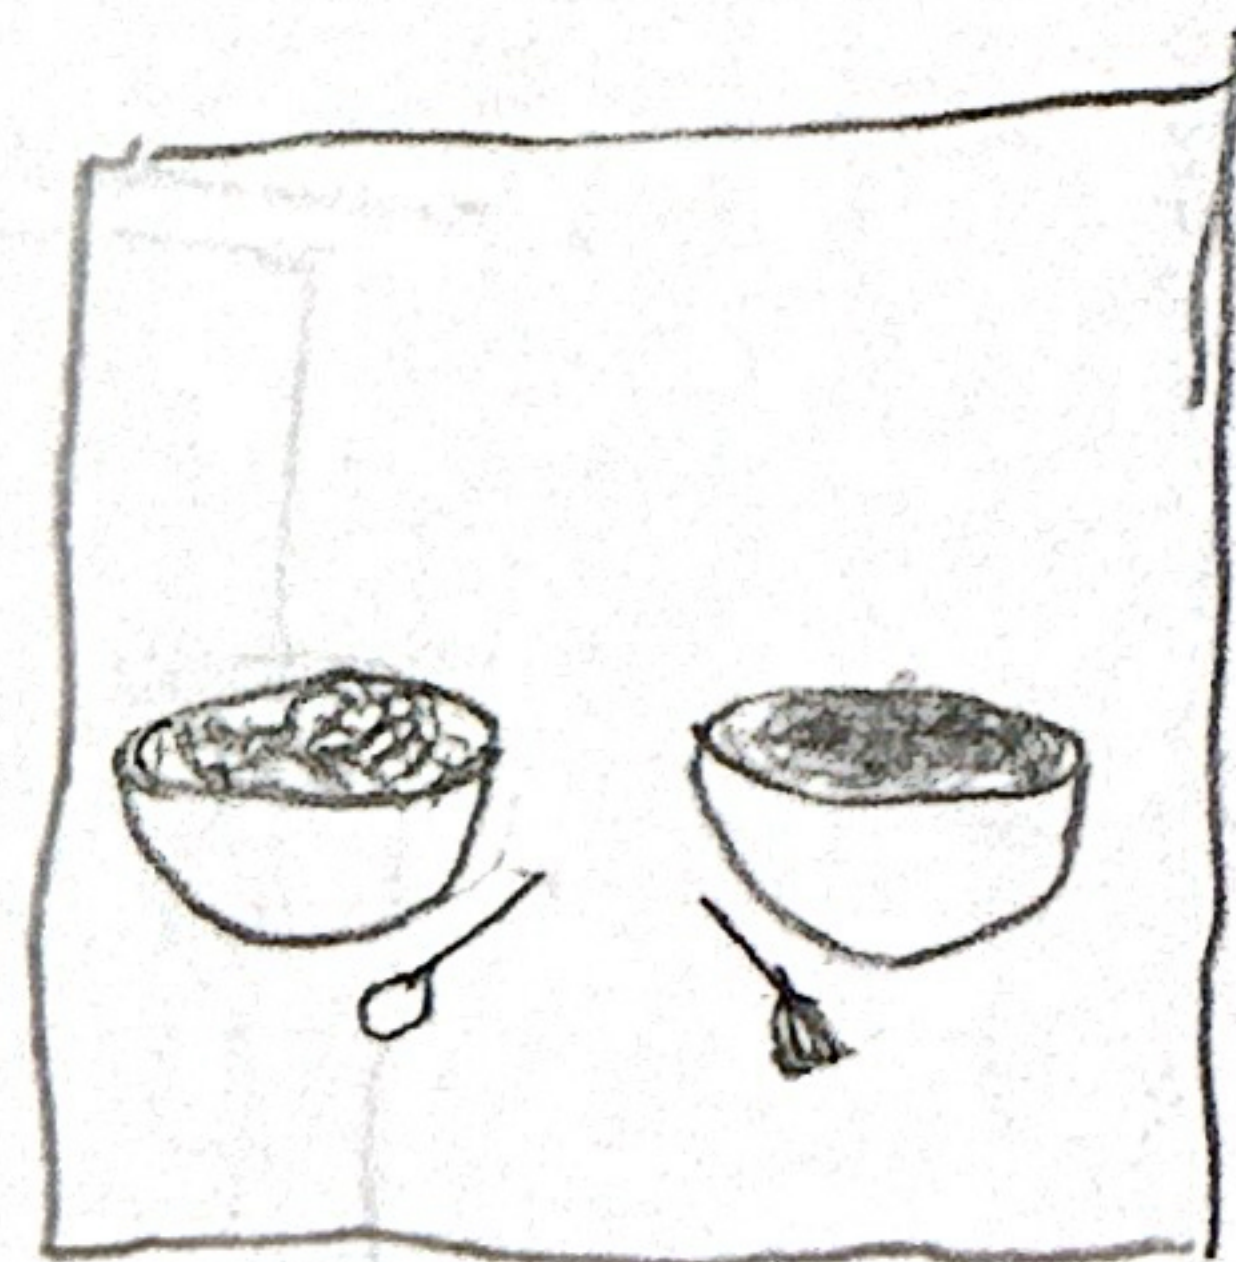

BMP / TIFF

The Bitmap is the largest meal you may try in our menu, but it never cuts down on its flavor profile. But if you wish for a slightly smaller dish with similar benefits Tagged Image File Format may be the dish for you.

SVG

Scalable Vector Graphics provide an experience unlike the others. The texture can be smooth or rough, the taste can be the same or a blend, it is a whole new experience every time you try it.

WebP / AVIF

WebP or Web Picture will provide you options for the variety of ways you might like it, from PNG to GIF, you can tailor it to how you like it. If you want the colorful taste of a JPEG but the strength of a PNG, then the AVI Image File Format may be the dish for you.
